PROFESSIONAL SUMMARY

AI Engineer | MERN Full-Stack Developer
AI Engineer / Full-Stack Software Engineer with hands-on experience building **LLM-powered applications, RAG pipelines, AI agents**, and scalable backend systems using **TypeScript, Node.js, Express.js, NestJS, LangChain, MongoDB Vector Search**, and cloud services. Experienced in integrating LLMs into real-time AI products, **browser automation**, and **event-driven systems**.

TECHNICAL SKILLS

- **GenAI:** LLMs, RAG, Prompt Engineering, LangChain, Embeddings, Vector Search, AI Agents, Tool Calling, LLM Evaluation
- **Programming Languages:** TypeScript, JavaScript, SQL
- **Frontend:** React.js, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
- **Backend:** Node.js, Express.js, NestJS, REST APIs, Microservices, JWT, WebSockets, WebRTC, Spring, Spring Boot
- **Database:** MongoDB, MongoDB Vector Search, MySQL
- **Cloud & Tools:** AWS (IAM, EC2, ECS, SQS, S3, RDS, Lambda, Cognito), GCP (Cloud Run, Cloud Scheduler, Vertex AI), Docker, Git/GitHub, GitHub Actions (CI/CD), n8n, Postman

PROFESSIONAL EXPERIENCE

Software Engineer Intern | mple.ai | Mumbai *Jan 2026 – Jun 2026*
Technologies used: TypeScript, Next.js, React, NestJS, MongoDB, Mongoose, MongoDB Vector Search, DuckDB, AWS, GCP, LangChain, WebRTC, WebSockets, FFmpeg

- Built **Global Bot**, an enterprise **RAG** knowledge bot that answers employee questions from company PDFs, PPTs, and URLs, with background training via **AWS SQS**.
- Developed a "**Chat with Data**" AI feature that allows users to seamlessly talk to their Excel and CSV files in plain text, powered by an **LLM Text-to-SQL router** and **DuckDB** querying over Parquet files on **S3**.
- Built advanced **MongoDB (Mongoose) aggregation pipelines** for enterprise reports, auto-triggered via cron and delivered to clients as Excel.
- Migrated authentication from localStorage tokens to **HTTP-only secure cookies** with **AWS Cognito** and silent token refresh, improving security against XSS.
- Troubleshot, debugged, and resolved application issues, improving application usability.

MERN Stack Developer (Full-time) | One Roof Web | Lucknow *Jun 2022 – Feb 2024*
Technologies used: JavaScript, React.js, Node.js, Express.js, MongoDB, JWT, REST APIs, Razorpay, Git/GitHub, Postman

- Developed and maintained **enterprise web applications** using **React.js, Node.js, Express.js, and MongoDB**.
- Built **secure RESTful APIs** using **JWT authentication, role-based authorization**, and layered architecture.
- Developed **responsive frontend** features using **React.js**, HTML, CSS, and JavaScript.
- Worked on database operations and **query optimization** using **MongoDB**.
- Collaborated with cross-functional teams, performed **debugging, code reviews**, **API testing** using **Postman**, and maintained applications.

Key Client Projects:

E-Commerce Platform (Multi-Client, Role-Based) | *Team Size: 5*
Tech Stack: Node.js, Express.js, MongoDB, React.js, JWT, Razorpay

- Built secure **JWT authentication** (access and refresh tokens, signup, login, logout, blocked-user checks) and enforced **role-based authorization** for Admin, Staff, and Customer across all APIs using **Express.js middleware**.
- Developed the end-to-end **checkout and order management** module with server-side price calculation, coupon application, and a validated order lifecycle (Confirmed, Packed, Shipped, Delivered, Cancelled).
- Integrated **Razorpay** with server-side signature verification and **idempotent webhook handling**, plus Cash on Delivery, ensuring payments were confirmed reliably even if users closed the browser mid-payment.
- Implemented **concurrency-safe inventory management** using atomic MongoDB stock updates and a scheduled job that releases stock for unpaid orders, preventing overselling during simultaneous purchases.
- Built cancellation and **refund workflows** with ownership checks (customers access only their own orders) and a full order status history for audit.
- Wrote **unit and integration tests** for pricing, stock, and payment logic.

CRM Platform | *Team Size: 5*

Tech Stack: Node.js, Express.js, MongoDB, React.js, JWT

- Developed backend **REST APIs** for a CRM system to manage leads, sales pipeline, and customer follow-ups using **Node.js, Express.js, and MongoDB**.
- Implemented **JWT authentication** with **role-based access control** for Admin, Manager, and Sales Rep roles.
- Built **lead management** features (add, edit, search, filter, duplicate detection, merge) with **automatic round-robin lead assignment** to sales reps.
- Created an **activity timeline and audit log** to track changes made by users.
- Optimized database queries using **indexing and pagination**.
- Followed a **layered architecture** with **global exception handling** and wrote **unit tests**.

PROJECTS

FCP – AI-Powered Full-Stack Coding Platform | GitHub | Live

Tech Stack: TypeScript, React, NestJS, MongoDB, Google Gemini AI, Tailwind CSS, JWT, Monaco Editor, Sandpack, Zustand

- Architected a **role-based Full-Stack Coding platform** using **NestJS and React**, featuring an **Admin dashboard** for managing AI-generated challenges and a **Learner workspace** for writing and executing full-stack code directly in the browser.
- Integrated **Google Gemini AI** to dynamically generate programming challenges, provide **automated code evaluations**, and power an interactive **AI Chatbot** that assists users with real-time debugging and hints.

JAP – AI-Powered Job Application Platform | GitHub | Live

Tech Stack: NestJS, MongoDB, Playwright, Google Gemini AI, Google OAuth 2.0, Google Drive API

- Architected an **AI-driven job application automation platform** — parses resumes into a structured candidate persona (role, title, skills), and uses a **Playwright-based automation service** powered by **Gemini-driven field intelligence** to scrape relevant job listings using that persona, then auto-fill and submit applications using the persona and stored profile data.
- Built an interactive dashboard with **automated/manual scraping** controls, and **auto/manual apply** options for each job.
- Built a scalable backend with **NestJS and MongoDB**, implementing secure **Google OAuth 2.0** authentication and **Google Drive API** integration for resume storage.

EDUCATION

Master of Computer Applications (MCA) *2024 – 2026*
Vivekanand Education Society's Institute of Technology (VESIT), Mumbai | **CGPA: 9.12/10**

Bachelor of Computer Applications (BCA) *2019 – 2022*
Tilak Maharashtra Vidyapeeth University, Pune | **CGPA: 8.52/10**

CERTIFICATIONS & COURSES

- **Spring Boot with Microservices** | AshokIT Software Training Institute
- **Programming in Java** | IIT Kharagpur (NPTEL)
- **AWS Academy Machine Learning Foundations** | AWS Academy Graduate
